Glendale School District Hires Secure Content for Network Assessment

Secure Content awarded network security contract by the Glendale Unified School District

Oakland, California USA — August 7, 2003 — Secure Content, a California-based company that provides managed security services, was selected to assess the network and application security of the Glendale Unified School District and recommend security fixes to their network structure.

Glendale Unified has earned a reputation for achieving and maintaining the highest standards on campus, which are safe and secure for learning. Their concern for security extends to their critical network infrastructure, so they have turned to security specialists for help.

Secure Content is conducting penetration testing and application code reviews for GUSD's online programs later this month. GUSD is active in reducing Internet risk and have partnered with Secure Content security professionals for help.

About Secure Content

Secure Content provides managed security services customized to the specific requirements of regulated industries which include Education, Banking and Finance, and Healthcare. Secure Content is a subscription-based managed service provider that provides state-of-the-art Internet security solutions to companies worldwide.

Secure Content constantly enhances its services to stay abreast of regulatory requirements and industry best practices. Secure Content customers leverage economies of scale to achieve increased service levels and a higher overall level of security.
